Charging case ×1

USB Type-C™ Charging Cable ×1

Quick Start Guide ×1

Powering on

① Press the earbud to pop out and remove from the case.

② Fold the earbuds for comfortable fit.

Get started

Pair and connect with Bluetooth®

While the buds are in the charging case, press and hold the button on the case for 5 seconds.

Android*: A pop-up will appear on your screen prompting you to connect to your HMD Amped.

iOS/macOS: Go to Bluetooth settings and search for "HMD Amped" to connect.

*If the mobile phone supports Google Fast Pair function, when the earbuds are taken out for the first time, the interface of HMD Amped buds will pop up on the mobile phone. Click to connect and then complete the pairing.

LED

-Red / white LED flashes three times

Reverse wireless charging

Press the charging case function button once and place the charging case on the back of your smartphone with wireless charging support.

Casing LED Behavior:

White LED: battery level is between 15% and 100%

Red LED: battery level is between 0% and 15%

Dual device connection

- i) Keep the earbuds inside the charging case.
- ii) Press and hold the button on the case for 5 seconds.
 - a. Pair the earbuds with the first device.
- iii) Press the button on the case again for 5 seconds.
 - a. Repeat the pairing process with the second device.
- iv) Wait for 10 seconds.
- v) Remove the earbuds from the charging case.
 - a. The earbuds will automatically connect to both devices after the initial dual connection is established.

Note: If you wish to pair AMPED buds with more devices, restart the process from Step 1. Please note that the AMPED buds can be connected to two devices simultaneously. However, the other connected device will remain inactive until you disconnect one of the active devices.

Charging

"The Amped Buds have internal, non-removable polymer battery and the charging case has an internal, non-removable polymer battery. Do not attempt to remove the batteries.

For environmental reasons this package does not include a charger. This device can be powered with most USB power adapters and a cable with USB Type-C plug. Please use only chargers and cables that are compliant with applicable country regulations, international and regional safety standards to avoid any risk of property loss or personal injury.

The power delivered by the charger must be between min 5 Watts required by the radio equipment, and max 10 Watts in order to achieve the maximum charging speed.

Product and safety information

Remote control functions may vary depending on the model of your device and application.

Sound track instructions do not respond to iOS devices. Since devices with Bluetooth wireless technology communicate using radio waves, they do not need to be in direct line-of-sight. Bluetooth devices must, however, be within 10 meters (33 feet) of each other, although the connection may be subject to interference from obstructions such as walls or from other electronic devices.

Frequency Band: 2.402~2.480 GHz

Maximum Radio Frequency Power: -6~+8dBm

For your safety

Important: Read these simple guidelines. Not following them may be dangerous or against local laws and regulations. For further info, read the complete user guide. Switch off in restricted areas

Switch the device off when a Bluetooth headset use is not allowed or when it may cause interference or danger, for example, in aircraft, in hospitals or near medical equipment, fuel, chemicals, or blasting areas. Obey all instructions in restricted areas.

Interference

All wireless devices may be susceptible to interference, which could affect performance.

Batteries, chargers, and other accessories

Use only batteries, chargers, and other accessories approved by HMD Global Oy for use with this device. Do not connect incompatible products.

Protect your hearing

To prevent possible hearing damage, do not listen at high volume levels for long periods.

Hearing

Warning: When you use the headset, your ability to hear outside sounds may be affected.

***Do not use the headset where it can endanger your safety.**

Small children

Your device and its accessories are not toys. They may contain small parts. Keep them out of the reach of small children.

Take care of your device

Handle your device with care. The following suggestions help you keep your device operational:

- **Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that corrode electronic circuits.**
- **Do not use or store the device in dusty or dirty areas.**
- **Do not store the device in high temperatures. High temperatures may damage the device or battery.**
- **Do not store the device in cold temperatures. When the device warms to its normal temperature, moisture can form inside the device and damage it.**
- **Do not open the device other than as instructed in the user guide.**
- **Do not drop, knock, or shake the device or the battery. Rough handling can break it.**
- **Only use a soft, clean, dry cloth to clean the surface of the device.**
- **Do not paint the device. Paint can prevent proper operation.**

Recycle

Always return your used electronic products, batteries and packaging materials to

dedicated collection points. This way you help prevent uncontrolled waste disposal and promote the recycling of materials. Electrical and electronic products contain a lot of valuable materials, including metals (such as copper, aluminium, steel, and magnesium) and precious metals (such as gold, silver, and palladium). All materials of the device can be recovered as materials and energy .

Crossed-out wheelie bin symbol

The crossed-out wheelie bin symbol on your product, battery, literature, or packaging reminds you that all electrical and electronic products and batteries must be taken to separate collection at the end of their working life. Do not dispose of these products as unsorted municipal waste: take them for recycling. For info on your nearest recycling point, check with your local waste authority.

Battery info

Your device has an internal, non-removable, rechargeable battery. Do not attempt to remove the battery, as you may damage the device. The battery can be charged and discharged hundreds of times, but it will eventually wear out. Charging time can vary depending on device capability.

Battery Safety

If left unused, a fully charged battery will lose its charge over time. Always keep the battery between 15°C and 25°C (59°F and 77°F) for optimal performance. Extreme temperatures reduce the capacity and lifetime of the battery. A device may temporarily stop working if its battery is too hot or too cold.

Do not dispose of batteries in a fire as they may explode. Obey local regulations. Recycle when possible. Do not dispose as household waste.

Use the battery and charger for their intended purposes only. Improper use, or use of unapproved or incompatible batteries or chargers may present a risk of fire, explosion, or other hazard, and may invalidate any approval or warranty. If you believe the battery or charger is damaged, take it to a service centre or your local shop before continuing to use it. Never use a damaged battery or charger. Only use the charger indoors. Do not charge your device during a lightning storm.

Implanted medical devices

To avoid potential interference, manufactures of implanted medical devices recommend a minimum separation of 15.3 centimetres (6 inches) between a wireless device and the implanted medical device. Persons who have such devices should:

- Always keep the wireless device more than 15.3 centimetres (6 inches) from the medical device.
- Not carry the wireless device in a breast pocket.
- Switch the wireless device off if there is any reason to suspect that interference is taking place.
- Follow the manufacturer directions for the implanted medical device.

If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

Copyrights and other notices

The availability of products, features, apps, and services may vary by region. For more info, contact your dealer or your service provider. This device may contain commodities, technology or software subject to export laws and regulations from the US and other countries. Diversion contrary to law is prohibited.

Industry Canada notice to users

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause interference and (2) This device must accept any interference, including interference that may cause undesired operation of the device. See RSS-Gen, Section 8.4. This device complies with ICES-003 requirements for Class B ITE (Information Technology Equipment). CAN ICES-3 (B)/NMB-3(B) This device meets the IC requirements.

FCC Notice to users

The following statement applies to all products that bear the FCC logo and/or FCC ID on the product label.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. See 47 CFR Sec. 15.105(b).

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a different circuit from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. This device complies with part 15 of the FCC Rules.

FCC ID: 2AJOT-AMPD-BUDS

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation. See 47 CFR Sec. 15.19(a)(3). HMD Global has not approved any changes or modification to this device by the user. Any changes or modification could void the user's authority to operate the equipment. See 47 CFR Sec. 15.21.
